

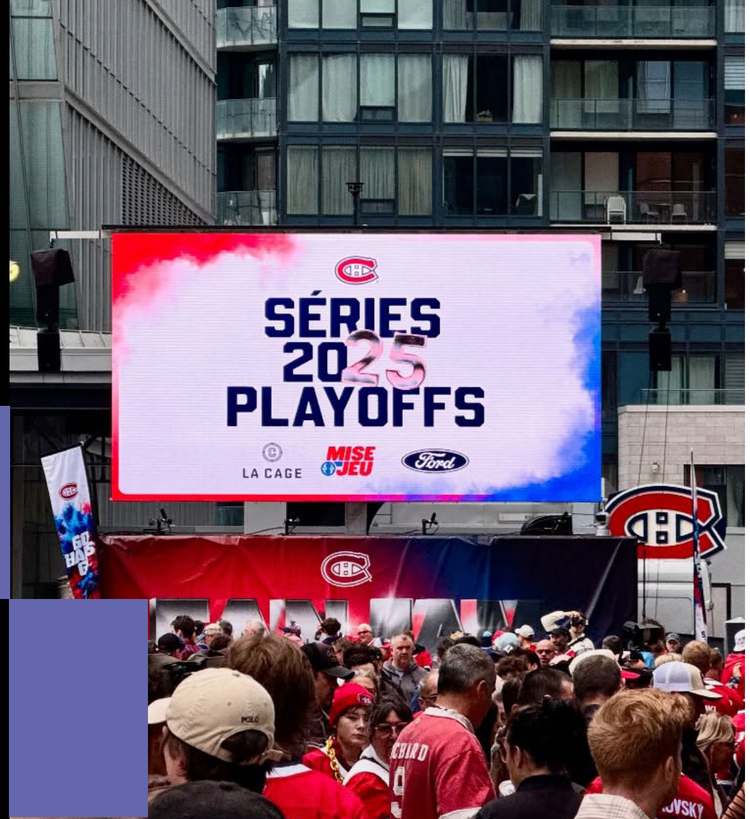
LED SCREEN TRAILERS

STAGE LINE®

DESIGNED SMART. BUILT STRONG.



STAGELINE SCREEN TRAILERS

HIGH-PERFORMANCE SCREEN TRAILERS REDEFINING YOUR EVENTS

Stageline's commitment to reliability, durability, and performance is now available in our full range of mobile LED Screen Trailers. The SP100 and ST100 are your turn-key solutions for maximum visibility and ultra-fast setup at any outdoor event.

IT ALL STARTS ON THE ROAD

STAGELINE MOBILE SCREEN TRAILERS ARE ENGINEERED FOR THE ROAD.

Stageline's advanced design combines a custom chassis with telescoping structures that will not alter their performance from mileage and bad roads. This results in excellent road handling and safety year after year.

HYDRAULIC DEPLOYMENT

Stageline LED Screen Trailers redefine large-format video setup
with a complete hydraulic system, putting speed and safety at your fingertips.

- SELF-LEVEL THE TRAILER ON ANY TERRAIN.
- HYDRAULICALLY RAISE THE MASSIVE LED SCREEN UP TO 30 FEET.
- ROTATE THE SCREEN A FULL 360 DEGREES FOR OPTIMAL VISIBILITY.

THE SP100 AT A GLANCE

SCREEN	SET-UP	WIND RESISTANCE	RIGGING
23’-7” x 13’-9” at a max height of 25’	1 technician 0:30 hours	57 mph (92 km/h)	8,000 lbs

ELEVATE YOUR EVENT WITH THE SP100

Engineered for ultimate versatility, this open-sided trailer provides an unmatched range of configurations capable of replacing traditional goal post or scaffold structures.

KEY FEATURES:

LIGHTNING-FAST DEPLOYMENT
Ready for action in just 30 minutes with a single technician.

TOTAL VIEWING FREEDOM
Project your content on a massive screen that offers 360-degree rotation for perfect visibility, no matter the crowd angle.

UNRIVALED STABILITY
Built with a galvanized steel chassis and heavy duty hydraulic stabilizers.
Highest wind resistance in its category.

HEAVY-DUTY CAPACITY
Securely rig and lift up to 8,000 lbs of screen and peripheral equipment with confidence.

SP100 CONFIGURATIONS

1 T-BAR
This configuration uses a rigging beam to attach a non-permanent screen.

2 DOUBLE T-BAR
Two non-permanent screens are mounted back-to-back and attached using two rigging beams. This configuration enables simultaneous viewing from opposite directions.

3 PERMANENTLY MOUNTED SCREEN
One permanent screen fixed to a backbone.

4 PERMANENTLY MOUNTED SCREEN & T-BAR
Combines one permanent screen with one non-permanent screen.

5 DELAY TOWER
Gives the ability to install a line-array system on either side.

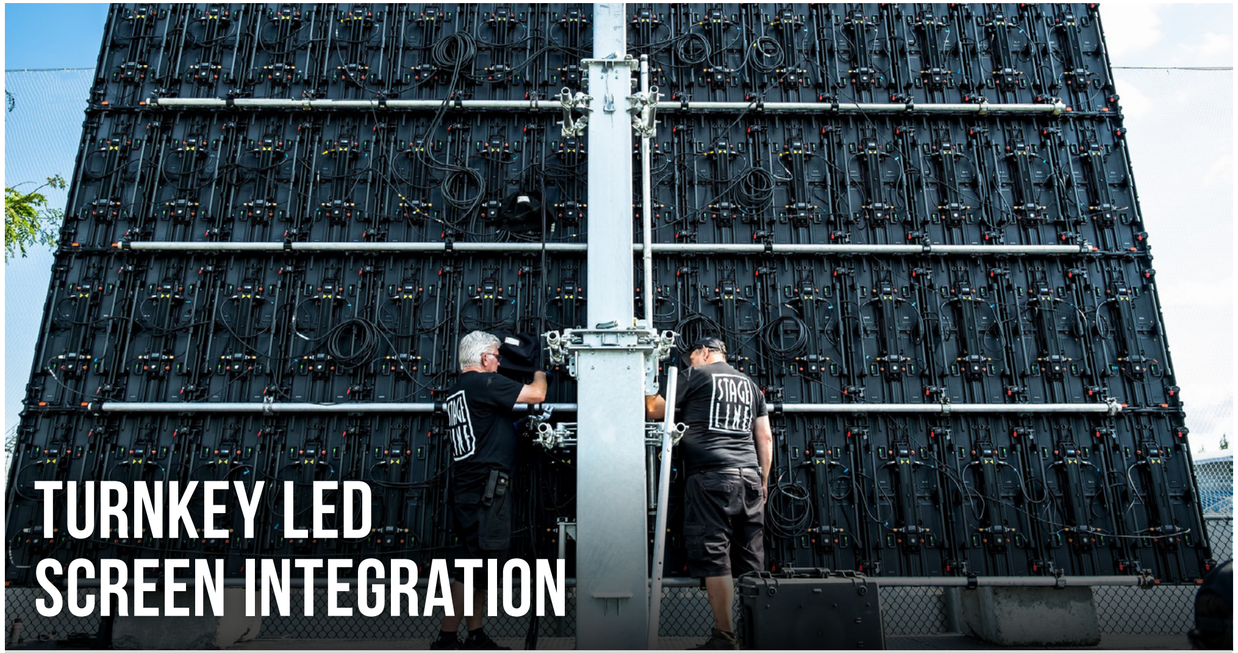
MAXIMIZE YOUR IMPACT: SCREEN & STAGE, ALL-IN-ONE!

At Stageline, we understand that truly impactful events require a powerful platform, not just a giant screen. That's why we're proud to offer the stage configuration capabilities of the Stageline ST100 and SP100 Mobile LED Screen Trailers, which deliver unparalleled screen and all-in-one stage solutions directly to your event. Both the ST100 and SP100 feature a fully integrated and customizable stage, creating a complete central hub for presenters, performers, and brand ambassadors to engage directly with the audience.



TURNKEY LED SCREEN INTEGRATION

Stageline offers seamless, professional video integration designed for maximum efficiency, reliability, and visual performance. We deliver a fully integrated, ready-to-roll solution so you can deploy and go live effortlessly at every event.

WHY THE INDUSTRY PREFERS STAGELINE

MOST WIDELY USED

More than 25,000 events per year in over 50 countries - an average of 68 events per day.

CRAFTSMANSHIP AND EXPERTISE

Every product is built in-house and benefits from serious engineering and craftsmanship with experience gathered from decades of use in outdoor events.

QUALITY CONTROL AND DELIVERY

Each product goes through a complete inspection during manufacturing including load tests and complete installation prior to delivery.

EXCEPTIONAL DURABILITY AND RELIABILITY

Built to last 25 years and more with proper care and maintenance.

PROVIDER OF SAFE STAGING ENVIRONMENTS FOR OVER 35 YEARS

Highest wind resistance - up to 115 mph (185 km/h) without windwalls and 77 mph (123 km/h) with windwalls. No incident causing an injury due to a breakdown of equipment.

OUTSTANDING VALUE

Low operation and maintenance cost. High resale value even after 10 years.

CERTIFICATION

Each product complies with road regulations. Stageline provides complete engineering certification for both structural design and rigging capacity for all countries. Certified documents available for each state and province of the US and Canada.

ENVIRONMENTALLY RESPONSIBLE

All products are manufactured in Stageline's state of the art LEED® certified facility integrating the latest environmental technologies.

AWARD-WINNING

Our company and products have archieved high acclaim in the industry and have won several engineering and event industry awards.

CUSTOMER SERVICE

CUSTOMER SUPPORT

We provide a complete 24/7 after sales support.

PARTS & ACCESSORIES

The best way to ensure that your Stageline equipment retains its original condition is to purchase your parts and accessories directly from Stageline.

INSPECTION & MAINTENANCE

Like any sophisticated piece of equipment, a Stageline equipment requires basic maintenance throughout the year. This maintenance must be performed according to specific guidelines. With this in mind, Stageline's engineers and experienced technicians have developed a unique inspection program. This program will give you a complete analysis of the condition of your equipment including a list of immediate repairs & recommendations.

TRAINING

Driven by the need to ensure technical efficiency, Stageline developed a training and certification program which meets and even exceeds its clients' and users' requirements. Operation of Stageline equipment by qualified personnel is directly linked with the enforceability of the warranty and is required to benefit from the technical support offered on all Stageline products.

With its training program, Stageline helps its users and client sincrease profitability on their investment through an efficient utilization of the products.

The main goal is to develop the aptitudes and technical knowledge of the technicians in order to preserve the products' integrity and guarantee durability and maximum safety levels.

"THERE'S NOTHING ELSE IN NORTH AMERICA THAT DOES WHAT THIS TRAILER DOES. IT'S SIMPLY THE ONLY REAL SOLUTION."

— Ryan Brenton, General Manager at Palmer Audio Inc.
